## EDUCATION

---

- |   |   |
|---|---|
| <b>Georgia Institute of Technology, Atlanta, GA</b><br>PhD in Electrical and Computer Engineering<br><i>Advised by Prof. Thomas Ploetz and Prof. Irfan Essa</i>                                   | <i>Aug. 2019 -</i><br>GPA – 3.75/4            |
| <b>Georgia Institute of Technology, Atlanta, GA</b><br>Master of Science in Electrical and Computer Engineering<br><i>Master's thesis advised by Prof. Thomas Ploetz and Prof. David Anderson</i> | <i>Aug. 2017 - May 2019</i><br>GPA – 3.75/4   |
| <b>PES Institute of Technology, Bangalore, India</b><br>Bachelor of Engineering in Electrical and Electronics Engineering   | <i>Sep. 2011 - June 2015</i><br>GPA – 8.95/10 |

## GRADUATE COURSEWORK

---

- |  |   |
|--|---|
| <ul style="list-style-type: none"><li>• Mathematical Foundations of Machine Learning</li><li>• Digital Image Processing</li><li>• Statistical Techniques for Robotics</li><li>• Random Processes</li></ul> | <ul style="list-style-type: none"><li>• Vision and Language</li><li>• Probabilistic Graphical Models</li><li>• PDEs for Image Processing and Vision</li><li>• ML with Limited Supervision</li></ul> |
|--|---|

## WORK EXPERIENCE & INTERNSHIPS

---

- |   |                      |
|---|----------------------|
| <b>Georgia Institute of Technology</b><br><i>Graduate Teaching Assistant</i>  | Aug 2018 - present   |
| <ul style="list-style-type: none"><li>• Graduate Teaching Assistant for the OMSCS Computer Vision course</li><li>• Responsibilities: grading assignments and projects, holding office hours and moderating discussions on Piazza</li></ul>  |                      |
| <b>Asurion</b><br><i>Data Science Intern</i>  | May 2018 - Aug 2018  |
| <ul style="list-style-type: none"><li>• Implemented neural image quality assessment (NIMA) and memorability models to rank photos for a photography service.</li><li>• Tools: PyTorch</li></ul>   |                      |
| <b>Asurion</b><br><i>Data Science Intern</i>  | May 2018 - Aug 2018  |
| <ul style="list-style-type: none"><li>• Worked with messaging data between Customers and Experts</li><li>• Clustered sentence level embeddings for the identification of concise, distinct questions asked by Customers used in an autocomplete feature</li><li>• Tools: Tensorflow, PyTorch, Keras, scikit-learn</li></ul>   |                      |
| <b>LEAP Labs, Indian Institute of Science</b><br><i>Project Assistant</i>   | Aug 2016 - July 2017 |
| <ul style="list-style-type: none"><li>• Developed speaker recognition, spoof detection and spoken language identification systems</li><li>• Participated in NIST Speaker Recognition Evaluation 2016 (SRE16) &amp; ASVspoof 2017 challenges</li><li>• Methods &amp; tools: ivectors (Microsoft Identity Toolkit, MATLAB), deep neural networks (Keras, Python), Kaldi</li></ul> |                      |
| <b>Deloitte Consulting USI</b><br><i>Business Technology Analyst</i>  | Aug 2015 - May 2016  |
| <ul style="list-style-type: none"><li>• Functional design, implementation, maintenance and documentation of a public sector Integrated Eligibility project in the Technology Consulting division</li><li>• Languages &amp; tools: Java, JavaScript, Excel, JIRA, SVN</li></ul>  |                      |

## ACADEMIC PROJECTS

---

### **The role of features in human activity recognition**

Aug 2018 - May 2018

*Understanding the role of various feature representations for human activity recognition using wearables*

*Master's thesis*

- Contrasted unsupervised representations from autoencoders against statistical, distribution-based, and supervised representations for their performance on a common backend classifier.
- Evaluated the representations from a wearable computing perspective – considering factors such as the memory footprint, number of trainable parameters, dimensionality of the representations etc.
- Advised by Prof. Thomas Plötz and Prof. David Anderson
- Tools: PyTorch, scikit-learn

### **Classification of acoustic scenes**

Jan 2018 - Nov 2018

*Classifying audio clips into acoustic scenes such as cafe, car, train etc*

*Research project*

- Working on audio machine learning and deep learning approaches to identify the ‘audio scene’
- Supervised by Prof. David Anderson
- Tools: Keras, PyTorch, scikit-learn

### **Visual instructions**

Jan 2018 - May 2018

*Teaching a robotic arm to slide a puck to destination from visual instructions using reinforcement learning techniques such as DDPG, PPO*

*STR Course project*

- Using the OpenAI Gym environment: FetchSlide-v0
- Tools: Tensorflow, OpenAI Gym

### **im2 $\text{\LaTeX}$**

Jan 2018 - May 2018

*Generating the  $\text{\LaTeX}$  markup of formulae from image inputs*

*PGM Course project*

- Studied the efficacy of variational autoencoders for generating the  $\text{\LaTeX}$  markup of the formula in the image
- Tools: Tensorflow, Keras

## SKILLS & INTERESTS

---

- Programming Languages - Python, MATLAB, Java
- Deep learning frameworks - PyTorch, Keras
- Interests - reading books (fantasy and non-fiction), climbing (bouldering)
- Languages -
  - Advanced: English, Kannada, Hindi, Telugu
  - Beginner: German
